

Safety Message

Dear Colleagues

We all are proud that plants are towards stabilization, after initial problems. It is a result of dedicated efforts by each one of us. We are an upcoming organization and have a set target to achieve and are committed to do so. In the process I want to take you all towards a commitment for safe working place and this can be achieved collectively. I want to emphasize zero tolerance towards safety lapses. It means that unsafe practices shall be completely avoided and no person shall get injured under any circumstances at the work place.

Our organization has conducted two safety audits and its recommendations are implemented to maintain the work place safe for one and all. I take this opportunity to request all of you to make the following as a habit at the work place

- a) Use of safety gears at workplace
- b) No short cuts to expedite a job
- c) Proper platform and guarded platform when working at height
- d) Complete de-energisation of electrical equipment's before start of work
- e) Work permit system to be followed (Electrical work also)

We should choose our steps properly so that it does not negate our efforts. I am confident that all of us will work together to reach our production goal and maintain our commitment towards safety.

Fate Saves Once A time, Safety Saves All the Time !
